Testing by Interviewer (Q162 to Q184)

We are now going to do some measures of physical health and memory.

The main reason for doing these tasks is to get an idea of how our three age groups compare. I have a card here on which I will write the results of some of the testing. When we get everyone's results we will send you the average results for this age group so that you can see how you went. These measures will take about 30 minutes to do.

First, I am going to take your blood pressure twice in the next five minutes or so. I'll just position your arm. (Take blood pressure reading preferably in the sitting position, and preferably using the left arm). **I'll now just put the cuff around your arm**. (The arm should be unrestricted by clothing, so roll up the sleeve.) Ensure that 'Inflation pre-set' is on 170). **The cuff will now automatically inflate when I press this button. Just remain calm and still.**

Q162a-e.

Once the cuff has automatically deflated say **that's great**. I am going to leave the cuff on now to make it easier to take your blood pressure again in a minute. (Loosen cuff but do not remove). If R complains of pain, remove cuff and do not retest.

Q163. We are now going to test your vision. First of all, I'll find the best place for you to view the chart. Find a good position for the eye chart to obtain the best light. Keep the chart covered until you are ready to do the test. Do not have the light coming from behind the chart. The eye chart needs to be about 3 metres away from you so I will use this ribbon to measure the distance to you. Move either the chart or the Respondent to get the correct distance. The chart should be at about eye level. If you normally wear glasses for distance vision please put them on. Uncover the chart. (change screen).

Mark any letter that is incorrect.

That's great. I will take the cuff off now, thank you.

Your average systolic blood pressure was ? and your average diastolic pressure was ?. A blood pressure reading of greater than 140 over 90 is considered to be above the desirable level for an adult. Your blood pressure falls ???.

Record results on card.

Q165. We are now going to try a very different task. Let's suppose you were going shopping tomorrow. I'm going to read a list of items for you to buy. Listen carefully, and when I've finished I want you to say back as many of the items as you can. It doesn't matter what order you say them in - just tell me as many as you can. Are you ready? Before proceeding, make sure that Respondent understands the task. Then read stimulus words at a rate of *approximately one word per second*, *reading down the list*.

If necessary, prompt with Are you ready to recall? After recalling as many items as they can, say Thanks for that.

Immediate recall score=_____

Q166. I would now like to test your hand strength. Stand and demonstrate as you say the following. First of all, using the hand you write with, put your fingers through this opening here and your thumb around the black plastic moulding here.

Now, you stand and hold the grip meter in the hand you write with, as I've shown. Put your arm down by your side. Now squeeze your fingers and thumb together as hard as you can. Record first measurement and move the lever to zero.

Kgs (*Refused*=88 *Not asked*=99) Record on card.

Q167. Now let's try that again using the same hand. Record second measurement.

Kgs (*Refused*=88 *Not asked*=99) Record on card.

Q168. I read some shopping items to your earlier. I'd like you to tell me all the items you can from the shopping list, starting now.

Delayed recall score=____

Q169. I am now going to ask you to do a task that can't be done on the computer. First I will give you this sheet. *Give Respondent Showcard C and use the printed instructions to explain the task.*

____ Number correct

Refused/Not asked=999 Couldn't comprehend/other=888

Q170a-b. We would now like to measure your lung capacity. (Insert the cardboard tube and push the switch to the FEV position). I'm going to take 3 measures so that we can average them for a more accurate reading. I'll ask you to stand to do this. Breathe in until your lungs are completely full. Now, seal your lips around the mouthpiece and blow out as hard and fast as possible until you cannot push anymore out. Record the first measure displayed under FEV. Now, push the switch upwards to the FVC position and record reading under FVC.

____ FEV ____ FVC (No reading=777, Refused=888, Not asked=999)

Q171a-b. Turn spirometer to 'OFF' position before turning it to FEV position for second reading. **Would you mind doing that again please?** If the Respondent complains of breathlessness or dizziness, wait for them to get their breath back before going on.

FEV FVC (No reading=777, Refused=888, Not asked=999)

Q172a-b. Turn spirometer to 'OFF' position before turning it to FEV position for third reading. **And just once more?** Again, if Respondent complains of breathlessness or dizziness, pause for them to get their breath back. If you have already had to before the second reading, do not continue with the third reading.

FEV FVC (*No reading=777, Refused=888, Not asked=999*)

Your average Forced Vital Capacity (or FVC) is _____ while your Forced Expired Volume in 1 second (or FEV) is _____. *Record results on card.*

Q173-177. Now I am going to say some numbers. When I stop I want you to say them backwards. For example, if I say 7-1-9, what would you say? Pause for respondent to respond. If respondent responds correctly (9-1-7) say, That's right and proceed to item 1. If respondent fails the example, say, No, you would say 9-1-7. I said 7-1-9, so to say it backwards you would say 9-1-7. Now try these numbers. Remember, you are to say them backwards. 3-4-8. Whether respondent succeeds or fails with the second example (3-4-8) proceed to item 1. Give no help on this second example or on any of the items to follow. *Read at a rate of one number per second*

Digit backwards score = _____

I am now going to ask you to do another task. This is a exercise to see how quickly and accurately you can work with your hands. Before you begin each part of the test, you will be told what to do and then you will have an opportunity to practice. Be sure you understand exactly what to do. Firstly, could you tell me which is your preferred or dominant hand? (Do first test with dominant hand or right hand if ambidextrous).

Q178. ORight OLeft OAmbidextrous ODon't know

Pick up one pin at a time with your (*right/left*) **hand from the** (*right/left*) **cup. Starting with the top hole, place each pin in the** (*right/left*)**-hand row.** *Demonstrate* by placing one pin in top hole. **Now you may insert a few pins for practice. If during the testing time you drop a pin, do not stop to pick it up. Simply continue by picking another pin out of the cup.** *Correct any errors and answer any questions.* When respondent has inserted 3 or 4 and appears to understand the task, say Stop. Now take out the practice pins and place them back in the (right/left) cup.

Q179. When I say 'Begin', place as many pins as you can in the (*right/left*) - hand row starting with the top hole. Work as rapidly as you can until I say 'Stop'. Use stopwatch to time for 30 seconds then say 'Stop'. Record number of pegs inserted.

_ Number correct Refused/Not asked=99 Couldn't comprehend/other=88

Q180. Now, I would like you to do this again using the other hand. Repeat test.

___ Number correct Refused/Not asked=99 Couldn't comprehend/other=88

Q181. For this part of the test I would like you to use both hands at the same time. Pick up a pin from the right-hand cup with your right hand and at the same time pick up a pin from the left-hand cup with your left hand, and place the pins down the rows. Begin with the top hole of both rows. Demonstrate. Then replace the pins used for demonstration. Now you may insert a few pins with both hands to practice. After 3 or 4 pairs of pins have been correctly inserted, say: Stop. Take out the practice pins and put them back in the proper cups. Then say: When I say 'Begin', place as many pins as you can with both hands,

starting with the top hole of both rows. Work as rapidly as you can until I say 'Stop'. Are you ready? Begin. *Time for 30 seconds then say, 'Stop'.* Record total number of pairs inserted.

Place Trailmaking Sheet Part A Sample on the table in front of the Respondent. Give the respondent a pencil. Say: On this page [point] are some numbers. Begin at number 1 [point to 1] and draw a line from 1 to 2 [point to 2], 2 to 3 [point to 3], 3 to 4 [point to 4] and so on, in order, until you reach the end [point to circle marked "end"]. Draw the lines as fast as you can. Ready? Begin. If the subject completes the sample item correctly and shows that they know what to do, say, "Good! Let's try the next one." And give the test proper. If the Respondent makes a mistake, point out the error and explain it. If necessary guide the Respondent's hand through the trail, with pencil upside down. Then say: "Now you try it." Always, when turning to the proper test, say: On this page are numbers from 1 to 25. Do this the same way: Begin at number 1 [point] and draw a line from 1 to 2 [point to 2], 2 to 3

[point to 3], 3 to 4 [point to 4] and so on, in order, until you reach the end [point]. Draw the lines as fast as you can.

Ready? Begin!

Start timing as soon as the instruction is given to begin. Watch <u>closely to catch errors</u>. Call errors to the Respondent's attention immediately and have them proceed from the point the mistake occurred. Do not stop timing. Record the time taken to complete the test. Also record the number of errors. <u>If Respondent makes 5 errors or exceeds 300 seconds (5 minutes)</u> <u>discontinue the test</u>. At the end, say **That's fine.** (Enter 99, 999 or 9 if not tested).

Now, I am going to show you some faces. You will have 45 seconds to look at them. I want you to study the faces carefully so that you will be able to recognise them when I show them to you a second time along with faces you haven't seen before.

Here are the faces. Please study them carefully and try to remember them. *Show respondent Showcard D for 45 seconds.*

After 45 secs say. Now I'm going to show you a set of 25 faces. You've already seen 12 of them. I want you to tell me which faces you've seen before. *Show showcard E and say:*

Q184. Call out the numbers of the faces that you have already seen. If the respondent calls out fewer than 12 faces, encourage them to continue 'guessing' until a total of 12 choices is made. If respondent calls out more than 12 faces, ask them to eliminate the choices about which they are least confident until the total is reduced to 12.

This next measure looks at your knowledge of words. You will be asked to decide which of *two items*, such as 'bread' and 'glot', is a real word and which is an invented item; 'bread', of course, is the real word. Each of the pairs of items below contains one real word and one nonsense word invented so as to look like a word but having no meaning. Please mark the item in *each pair* that you think is a real word. Some will be common words, most will be uncommon and some will be rarely used.

If you are unsure, guess. You will probably be right more often than you think. Before you begin the main test try the following word pairs. Practice

END OF TESTING

The next series of questions are about how you have been feeling over the last two weeks, four weeks or one year. As you read each question, note carefully whether it refers to two weeks, four weeks or one year. Some of the questions are very similar but have been included because we want to be able to compare our results to other studies that have used the same questions.
